

# Freshwater Knoll

During the ownership of Clark and Dorothy Freshwater, 1992–2009

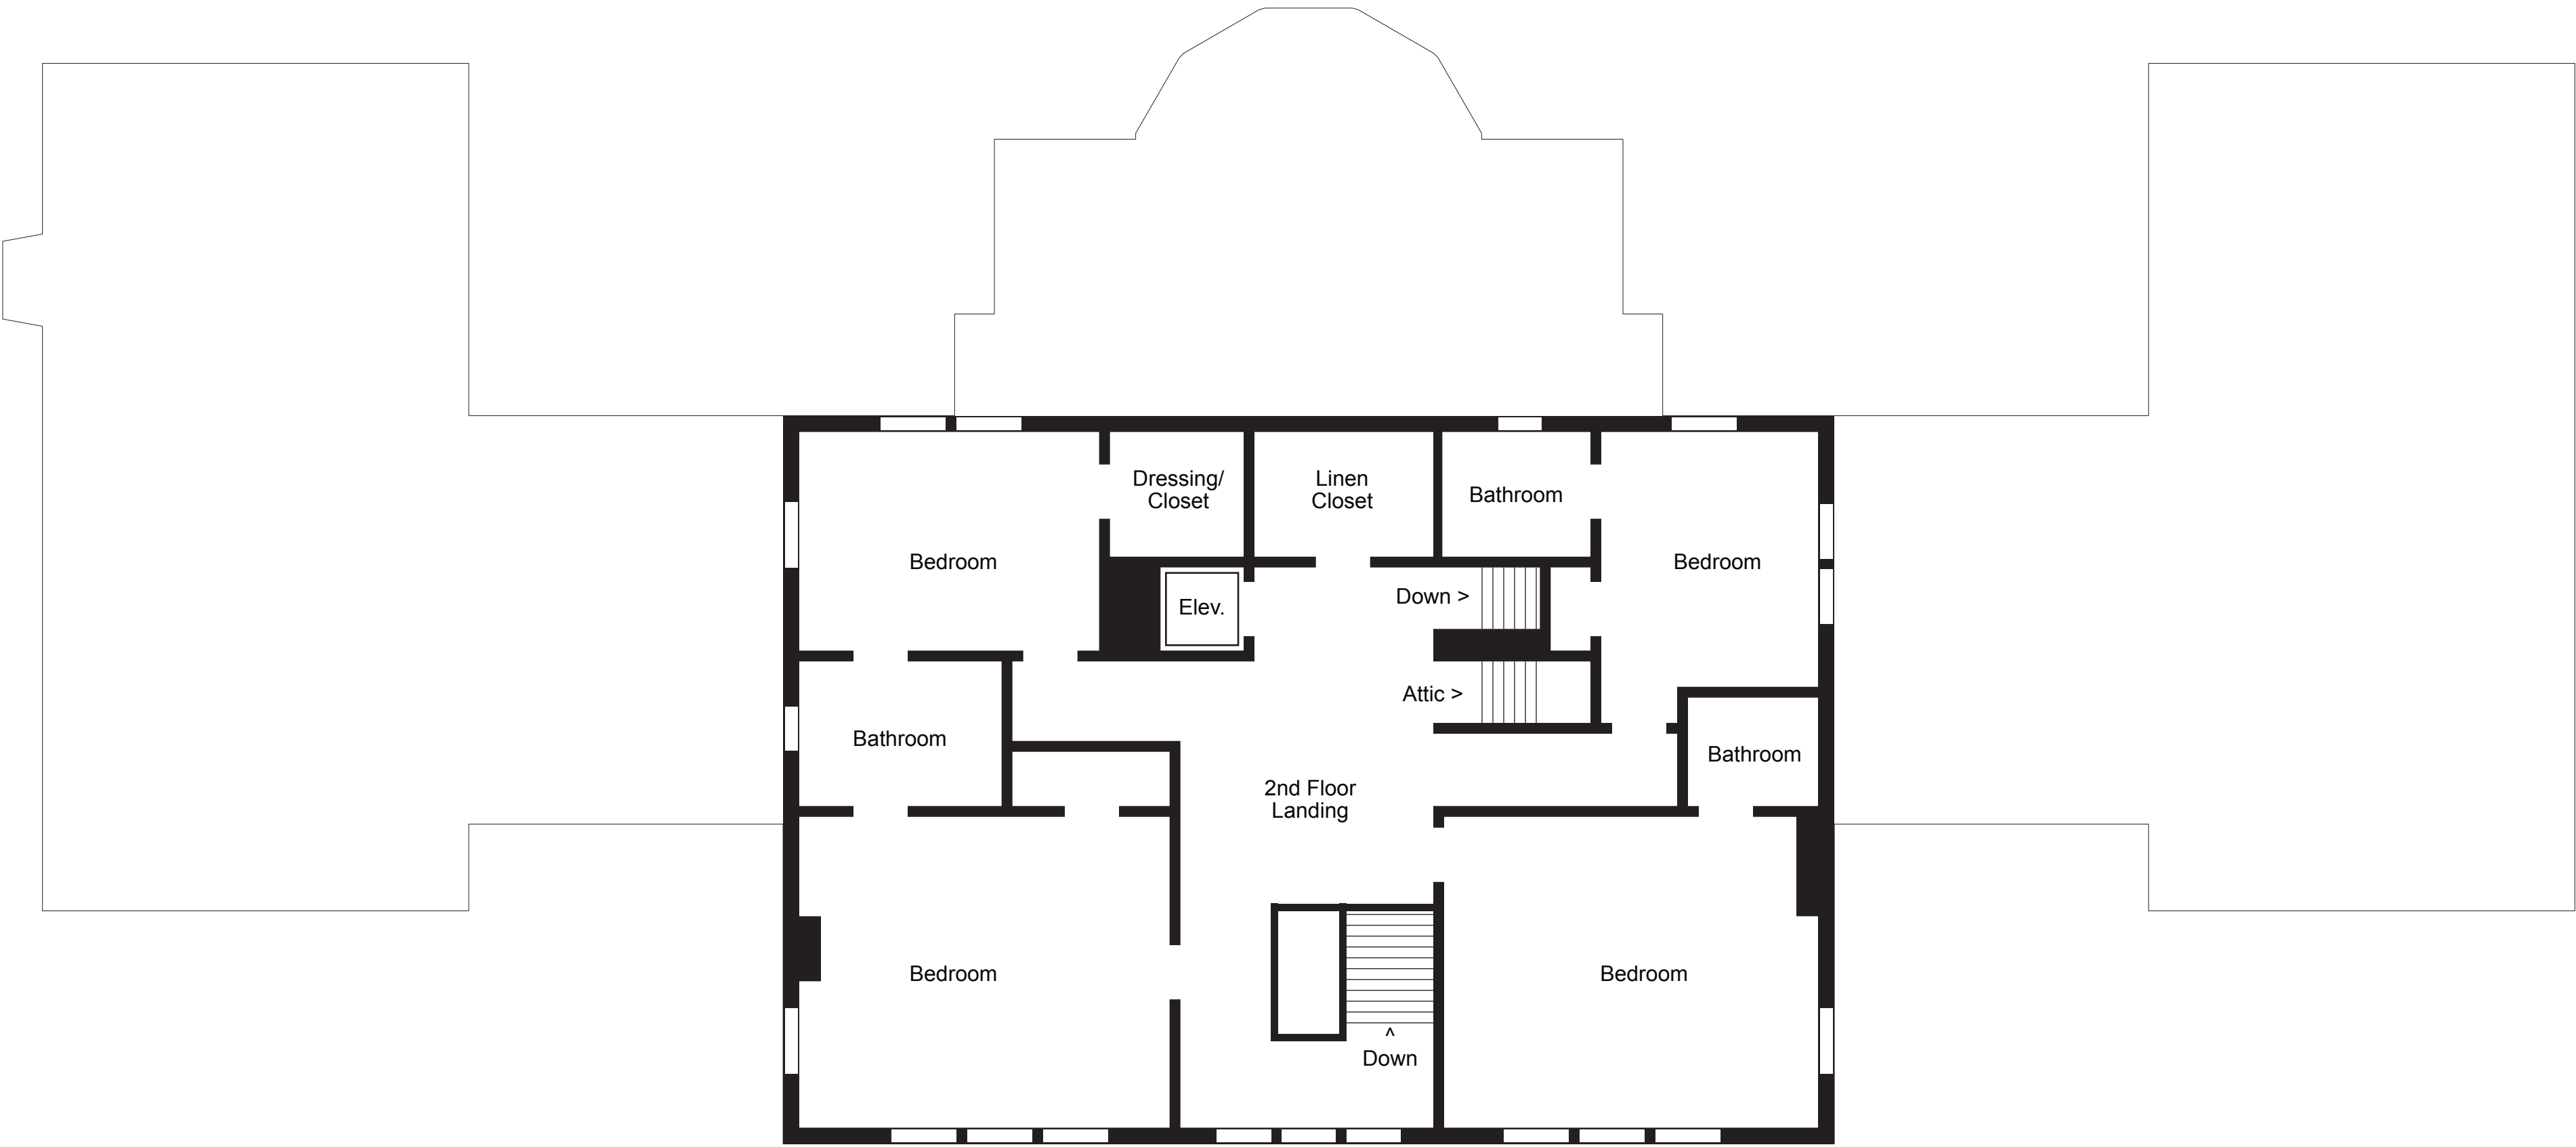

## Ground Floor

Some renovations were completed, particularly to the bedrooms, main bathroom, pantry, and kitchen. The private baths were functional but outdated, and the library, living, and dining rooms untouched.

## Upper Floor

Clark and Dorothy's renovations were never started on the second floor, so this area was closed off during the period they lived here.

## Basement

Minimal renovations were done, with a focus on security and utilities. The plunge pool/sauna room was untouched since the late 1930s and in a dangerously poor condition.
